

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (currently amended): A method of managing a telecommunication network including:

- receiving connection requests, said connections being determined on the basis of parameters contained in said requests and including time parameters,
- verifying the possibility of setting up the connections in accordance with said parameters, on the basis of a database in which all connections are stored, and
- updating said database if setting up said connection is possible,-

wherein the step of receiving connection requests, the step of verifying the possibility of setting up the connections, and the step of updating said database are performed by a scheduler program which spans a services management layer and a network management layer.

2. (original): The network management method claimed in claim 1 wherein said time parameters correspond to series of time intervals having a periodic character.

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. Appln. No.: 10/871,816
Attorney Docket No.: Q64768

3. (original): The network management method claimed in claim 2 wherein said time parameters take the form of a duration of uses/reservations repeated daily and/or weekly and/or monthly and/or annually.

4. (original): The network management method claimed in claim 1 wherein said time parameters correspond to series of time intervals having an aperiodic character.

5. (original): The network management method claimed in claim 4 wherein said time parameters include data corresponding to an absolute time and a finite or indefinite duration.

6. (original): The network management method claimed in claim 1 wherein the updating of available connections in said database allows for said time parameters.

7. (currently amended): A telecommunications network management unit including:
- means for receiving connection requests, said connections being determined on the basis of parameters contained in said requests and including time parameters,

AMENDMENT UNDER 37 C.F.R. § 1.111

U.S. Appln. No.: 10/871,816

Attorney Docket No.: Q64768

- means for verifying the possibility of setting up the connections in accordance with said parameters, on the basis of a database in which all calls are stored,

- means for updating said database accordingly, and

- means for reserving connections allowing for time parameters,-

wherein the means for receiving connection requests spans a services management layer and a network management layer.

8. (original): The network management unit claimed in claim 7 including means for updating connections in said network according to the content of said database, which contains reservations allowing for time parameters.
